ERASURE CERTIFICATE

01928c3e-5a1b-7000-8000-000000de4006

Issued 2026-10-05 00:00:00 UTC

Disphas

STORAGE DEVICE

Model	DEMO NVMe Data 2TB
Serial number	DEMO-NVME-4567
Firmware	DEMO01
Capacity	2,000,398,934,016 bytes (2,000.3 GB)
Type	NVMe
Identifiers	EUI-64 0011223344556677

SANITIZATION

Category	Clear
Method	Host overwrite, one pass of a pseudo-random stream (HostOverwrite)
Standards	NIST SP 800-88r2, IEEE 2883-2022
Firmware verification	passed
Validation	pattern read-back, 1,000 samples, passed
Finish	final pass of zeros, validated

FUTURE AND RESERVES

Recommended future	Reuse
Reserves	Host write: reallocated sectors not covered (R7)

ISSUER

Organization	Atelier XYZ
Operator	OP-042
Tool	disphas 0.1.0 · rules 1.0.0
License	DEMO-0001 — disphas — démonstration (Demo)

signature Ed25519

Attestation fingerprint 77cd 0e31 050f 0346 9cf7 252e 9c02 4574

Scan the QR code or run disphas-verify to check this certificate offline. The PDF is only a rendering: the signed attestation is the proof.

TECHNICAL ANNEX

Values needed to replay the validation and to audit the attached journal.

This certificate attests the sanitization of the device identified above according to NIST SP 800-88 and IEEE 2883. Free-text fields are reproduced as entered by the operator. disphas is not affiliated with, nor endorsed or certified by, NIST or the IEEE; the standards are cited to identify the methods applied.
