oblivio

Erasure certificate

Report `01928c3e-5a1b-7000-8000-000000de4009`
Issued 2026-10-05 00:00:00 UTC

COMPLIANT
Erasure proven and certified

Recommended future: physical destruction

Storage device

Model	DEMO HDD 4TB
Serial number	`DEMO-HDD-8C21`
Firmware	`DEMO01`
Capacity	4,000,787,030,016 bytes (4,000.7 GB)
Type	SATA-HDD
Identifiers	`WWN 5000c500deadbeef`

Sanitization

Category	Clear
Method	Host overwrite, one pass of a pseudo-random stream (HostOverwrite)
Standards	NIST SP 800-88r2, IEEE 2883-2022
Firmware verification	passed
Validation	pattern read-back, 1,000 samples, passed

Future and reserves

Recommended future	Physical destruction recommended High reallocated sector count (D4)
Reserves	Uncorrectable errors reported (R6) Host write: reallocated sectors not covered (R7)

Issuer

Organization	Atelier XYZ
Operator	OP-042
Tool	Oblivio 0.1.0 · rules 1.0.0
License	DEMO-0001 — Oblivio — démonstration (Demo)

Attestation fingerprint
`ec95 94b5 f5ce 4086 99db 0c88 ba06 106e`

Scan the QR code or run oblivio-verify to check this certificate offline. The PDF is only a rendering: the signed attestation is the proof.

Technical annex

Values needed to replay the validation and to audit the attached journal.

This certificate attests the sanitization of the device identified above according to NIST SP 800-88 and IEEE 2883. Free-text fields are reproduced as entered by the operator. Oblivio is not affiliated with, nor endorsed or certified by, NIST or the IEEE; the standards are cited to identify the methods applied.
