oblivio

Erasure certificate

Report `01928c3e-5a1b-7000-8000-000000de4011`
Issued 2026-10-05 00:00:00 UTC

COMPLIANT
Erasure proven and certified

Storage device

Model	DEMO SATA SSD Locked 256GB
Serial number	`DEMO-LOCK-7A11`
Firmware	`DEM001`
Capacity	256,060,514,304 bytes (256.0 GB)
Type	SATA-SSD
Identifiers	`WWN 5002538e00000002`

Sanitization

Category	Purge
Method	ATA Sanitize, Block Erase (AtaSanitizeBlockErase)
Standards	NIST SP 800-88r2, IEEE 2883-2022
Firmware verification	passed
Validation	canaries, 1,000 samples, passed

Future and reserves

Recommended future	Reuse
Reserves	none

Issuer

Organization	Atelier XYZ
Operator	OP-042
Tool	Oblivio 0.1.0 · rules 1.0.0
License	DEMO-0001 — Oblivio — démonstration (Demo)

Attestation fingerprint
`906b 8468 4337 df9c 420c 76e6 c07a 6a20`

Scan the QR code or run oblivio-verify to check this certificate offline. The PDF is only a rendering: the signed attestation is the proof.

Technical annex

Values needed to replay the validation and to audit the attached journal.

Attached files	journal.json (detailed journal), attestation.cose (signed attestation)

This certificate attests the sanitization of the device identified above according to NIST SP 800-88 and IEEE 2883. Free-text fields are reproduced as entered by the operator. Oblivio is not affiliated with, nor endorsed or certified by, NIST or the IEEE; the standards are cited to identify the methods applied.
