oblivio

Erasure certificate

Report 01928c3e-5a1b-7000-8000-000000de4010
Issued 2026-10-05 00:00:00 UTC

NON-COMPLIANT
Forced erasure — physical destruction required

Forcing justification
Démonstration : disque muet effacé à la demande du client avant destruction.

Storage device

Model	DEMO Unresponsive 1TB
Serial number	DEMO-MUTE-0N1X
Firmware	DEM001
Capacity	0 bytes (0.0 GB)
Type	Unknown
Identifiers	none

Sanitization

Category	Clear
Method	Host overwrite, one pass of a pseudo-random stream (HostOverwrite)
Standards	NIST SP 800-88r2, IEEE 2883-2022
Firmware verification	passed
Validation	pattern read-back, 1,000 samples, passed
Finish	final pass of zeros, validated

Future and reserves

Refusal reasons	Drive could not be inspected (N1)
Reserves	Host write: reallocated sectors not covered (R7)

Issuer

Organization	Atelier XYZ
Operator	OP-042
Tool	Oblivio 0.1.0 · rules 1.0.0
License	DEMO-0001 — Oblivio — démonstration (Demo)

Attestation fingerprint
3536 4399 6588 972e 9a00 537e 06b0 33bb

Scan the QR code or run oblivio-verify to check this certificate offline. The PDF is only a rendering: the signed attestation is the proof.

Technical annex

Values needed to replay the validation and to audit the attached journal.

This certificate attests the sanitization of the device identified above according to NIST SP 800-88 and IEEE 2883. Free-text fields are reproduced as entered by the operator. Oblivio is not affiliated with, nor endorsed or certified by, NIST or the IEEE; the standards are cited to identify the methods applied.
