oblivio

Erasure certificate

Report `01928c3e-5a1b-7000-8000-000000de4003`
Issued 2026-10-05 00:00:00 UTC

COMPLIANT
Erasure proven and certified

Storage device

Model	DEMO NVMe Data 2TB
Serial number	`DEMO-NVME-4567`
Firmware	`DEM001`
Capacity	2,000,398,934,016 bytes (2,000.3 GB)
Type	NVMe
Identifiers	`EUI-64 0011223344556677`

Sanitization

Category	Purge
Method	NVMe Format, cryptographic erase (NvmeFormatCryptoErase)
Standards	NIST SP 800-88r2, IEEE 2883-2022
Firmware verification	passed
Validation	canaries, 1,000 samples, passed

Future and reserves

Recommended future	Reuse
Reserves	none

Issuer

Organization	Atelier XYZ
Operator	OP-042
Tool	Oblivio 0.1.0 · rules 1.0.0
License	DEMO-0001 — Oblivio — démonstration (Demo)

Attestation fingerprint
`7a8c a218 01cf 0477 6092 369d 4cce 22cf`

Scan the QR code or run oblivio-verify to check this certificate offline. The PDF is only a rendering: the signed attestation is the proof.

Technical annex

Values needed to replay the validation and to audit the attached journal.

Report	`01928c3e-5a1b-7000-8000-000000de4003`
Validation seed	`0707 0707 0707 0707 0707 0707 0707 0707 0707 0707 0707 0707 0707 0707 0707 0707`
Rules version	`1.0.0`
Helper binary SHA-256	`0909 0909 0909 0909 0909 0909 0909 0909 0909 0909 0909 0909 0909 0909 0909 0909`

Attached files	journal.json (detailed journal), attestation.cose (signed attestation)

This certificate attests the sanitization of the device identified above according to NIST SP 800-88 and IEEE 2883. Free-text fields are reproduced as entered by the operator. Oblivio is not affiliated with, nor endorsed or certified by, NIST or the IEEE; the standards are cited to identify the methods applied.
