oblivio

Erasure certificate

Report `01928c3e-5a1b-7000-8000-000000de400b`
Issued 2026-10-05 00:00:00 UTC

REFUSED
Erasure not provable — physical destruction required

Storage device

Model	DEMO SATA SSD 500GB
Serial number	`DEMO-SSD-F0Z3`
Firmware	`DEMO01`
Capacity	500,107,862,016 bytes (500.1 GB)
Type	SATA-SSD
Identifiers	`WWN 5002538e00000001`

Sanitization

Category	—
Method	ATA Sanitize, Block Erase (AtaSanitizeBlockErase)
Standards	NIST SP 800-88r2, IEEE 2883-2022
Firmware verification	passed
Validation	canaries, 1,000 samples, failed

Future and reserves

Refusal reasons	Read errors during validation (N8)
Reserves	none

Issuer

Organization	Atelier XYZ
Operator	OP-042
Tool	Oblivio 0.1.0 · rules 1.0.0
License	DEMO-0001 — Oblivio — démonstration (Demo)

Attestation fingerprint
`3d60 e682 842b d16d 5510 cc78 2d3b 46ff`

Scan the QR code or run oblivio-verify to check this certificate offline. The PDF is only a rendering: the signed attestation is the proof.

Technical annex

Values needed to replay the validation and to audit the attached journal.

This certificate attests the sanitization of the device identified above according to NIST SP 800-88 and IEEE 2883. Free-text fields are reproduced as entered by the operator. Oblivio is not affiliated with, nor endorsed or certified by, NIST or the IEEE; the standards are cited to identify the methods applied.
