oblivio

Erasure certificate

Report `01928c3e-5a1b-7000-8000-000000004201`
Issued 2026-10-05 00:00:00 UTC

COMPLIANT
Erasure proven and certified

Recommended future: physical destruction

Storage device

Model	Fictional NVMe SSD 1TB
Serial number	`FICT0000A001`
Firmware	`FICT01FW`
Capacity	1,024,209,543,168 bytes (1,024.2 GB)
Type	NVMe
Identifiers	`EUI-64 00a07501fe0c0001`

Sanitization

Category	Purge
Method	NVMe Sanitize, Block Erase (NvmeSanitizeBlockErase)
Standards	NIST SP 800-88r2, IEEE 2883-2022
Firmware verification	passed
Validation	canaries, 1,000 samples, passed

Future and reserves

Recommended future	Physical destruction recommended High reallocated sector count (D4)
Reserves	Some sectors reallocated (R4)

Issuer

Organization	Atelier Œuvre & Łódź
Operator	J. Martin
Tool	Oblivio 0.1.0 · rules 1.0.0
License	LIC-0001 — Atelier XYZ (Pro)

Attestation fingerprint
`9be0 5339 ca3e 9a97 5a36 56da 9c03 9b90`

Scan the QR code or run oblivio-verify to check this certificate offline. The PDF is only a rendering: the signed attestation is the proof.

Technical annex

Values needed to replay the validation and to audit the attached journal.

This certificate attests the sanitization of the device identified above according to NIST SP 800-88 and IEEE 2883. Free-text fields are reproduced as entered by the operator. Oblivio is not affiliated with, nor endorsed or certified by, NIST or the IEEE; the standards are cited to identify the methods applied.
